

MERENSKY

UNTREATED POLE SPECIFICATION MANUAL – MATIWANE, EASTERN CAPE

Merensky's Building, Fencing, Telephone and Transmission Poles are superior in strength due to prime growing sites in Matiwane's plantations, and pole-specific silviculture. Poles are produced through FSC-certified practices.

UNTREATED BUILDING, FENCING AND TELEPHONE POLES

Our Building, Fencing and Telephone Poles are produced and optimised at our Pole Processing Plant. They are produced from tree lengths, and are then graded into their correct pole classes. Made-to-order requests are accepted.

Specifications	Requirements
Length (m)	1.5m to 7.2m in 300mm intervals
Length overcut (cm)	+ 0cm: cut to actual invoiced length
SED Range (mm)	50 to 75mm; 75 to 100mm; 100 to 125mm
Bark	All poles are totally debarked
FSC certification	All poles are FSC certified (SAFM/COC-005152)

UNTREATED TRANSMISSION POLES

Our Transmission poles are made-to-order, and are of high quality, driven by world-class silviculture practices. Transmission Poles are selected in-field by highly trained graders during the thinning and clear-felling operations.

Specifications	Requirements
Length (m)	5m to 18m in 1 m intervals
Length overcut (cm)	+ 10cm
SED Range (mm)	80 to 220mm in 20mm intervals, per SED classes
Bark	All poles are totally debarked
FSC certification	All poles are FSC certified (SAFM/COC-005152)
