

MERENSKY

**SOFTWOODS
SPECIFICATION**

LOCAL-GRADE LOGS

Our Pinus species plantations are grown on a pruned saw-log rotation to the highest silvicultural standards for saw log production.

Our second-generation genetic stock is specifically developed for saw log production.

All of our timber is FSC® certified and allows the customer peace of mind that they are purchasing sustainably grown plantation timber.

Grade	Saw Pulp	Class A	Class B	Class C	Class D
Length	2,5m	2,4 - 6,6m	2,4 - 6,6m	2,4 - 6,6m	2,4 - 6,6m
Diameter	10 - 12,9cm	13 - 17,9cm	18 - 25,9cm	26 - 33,9cm	34cm

- Log are sold on the roadside, and may be delivered to the customer upon request at the current transport rates.
- Logs are graded according to the South African Forestry handbook's log specifications.
